

## API Spec / Sandbox to play with the API

You can follow the link below to learn about the API specs and sample code to fetch from the API. You can also play with the API there once you have obtained your API key from us.

<https://offenders.readme.io/reference/search>

## Request Format

We support 2 search modes, GIS (geolocation) search, and regular search.

### GIS (geolocation) search

The GIS mode is used to do geolocation-based searches, it takes in lat, lng, and radius. You can further filter down the results with query params: firstName, lastName, city, state, zipcode, dob:

[https://api.offenders.io/sexoffender?lat=30.967139&lng=-91.116236&radius=2&key={YOUR\\_API\\_KEY}&firstName=Michael](https://api.offenders.io/sexoffender?lat=30.967139&lng=-91.116236&radius=2&key={YOUR_API_KEY}&firstName=Michael)

### Regular search

The Search Mode will search based on the provided query params, you can use any combination of firstName, lastName, city, state, zipcode, dob. The API will process your query as long as there is at least one query params presented in the request:

[https://api.offenders.io/sexoffender?key={YOUR\\_API\\_KEY}&firstName=Alice&zipcode=12345](https://api.offenders.io/sexoffender?key={YOUR_API_KEY}&firstName=Alice&zipcode=12345)

### Regular search - Extensive Mode (requires Mega+ tier)

The Search Mode supports an additional `&mode=extensive` param, which will pull additional datasets to perform an extensive search & match for your query. The `extensive` mode should be used if you need State-compliance visitor screening (e.g. healthcare facilities). Please note this mode will come with a significant response time increase compared to the normal mode and should only be used if needed (~ 2s+ response time). **The extensive mode has a rate limit and should not be used for batch processing.**

## Request Query Params

You can find all the supported query params and play with the API endpoint here <https://offenders.readme.io/reference/search>

Field Name	Description	Example Value
<b>firstName</b>	(string) First name of the offender	"Alice"
<b>lastName</b>	(string) Last name of the offender	"Ceci"
<b>dob</b>	(string) A valid date	"1900-01-01"
<b>city</b>	(string) Residence city of the offender	"San Francisco"
<b>state</b>	(string) Residence state of the offender. Use full state name only	"California"
<b>zipcode</b>	(string) Residence zipcode of the offender	"94104"
<b>lat</b>	(number) Latitude of the offender's registered residential address	<a href="#">41.85321135</a>
<b>lng</b>	(number) Longitude of the offender's registered residential address	<a href="#">-87.72353654</a>
<b>radius</b>	(number) Radius of the geolocation search, only valid when performing a GIS search with lat/lng. <b>When not supplied, the radius will default to 1 mi, and the max for radius is 5 mi</b>	<a href="#">1</a>

## Request Response Fields

You can find the response example in the bottom-right **Response** section of our API spec <https://offenders.readme.io/reference/search>

Field Name	Description	Example Value	Empty Value
<b>name</b>	(string) Full name of the offender including middle name if available	"Alice Bob Ceci"	""
<b>firstName</b>	(string) First name of the offender	"Alice"	""
<b>lastName</b>	(string) Last name of the offender	"Ceci"	""
<b>dob</b>	(ISO Date String) Date of birth of the offender. Please note all DOB is stored as UTC time, please make sure you process them accordingly.	"1957-07-14T00:00:00.000Z"	<b>null</b>
<b>address</b>	(string) Residence address of the offender	"000 Farris Street"	""
<b>city</b>	(string) Residence city of the offender	"San Francisco"	""
<b>state</b>	(string) Residence state of the offender. Use full state name only	"California"	""
<b>zipcode</b>	(string) Residence zipcode of the offender	"94104"	""
<b>sex</b>	(string) Registered sex of the offender	"Male"	""
<b>age</b>	(string) Age of the offender	"40"	""
<b>eyeColor</b>	(string) Eye color of the offender	"Blue"	""
<b>hairColor</b>	(string) Hair color of the offender	"Brown"	""

<b>height</b>	(string) Height of the offender	"6'00\""	""
<b>weight</b>	(string) Weight of the offender	"260 lbs."	""
<b>race</b>	(string) Race of the offender	"White"	""
<b>marks</b>	(string) Marks/Tatto/Scars of the offender	"tattoo on chest (anarchy symbol)"	""
<b>riskLevel</b>	(string) Risk level of the offender	"High risk"	""
<b>crime</b>	(string) specific crimes committed for the registration. Not all States disclose this information.	"Crime: 0735000 - MURDER WITH INTENT TO KILL OR INJURE, Victim's age: 16, Offender's age: 19, Conviction County: Cook"	""
<b>registrationDate</b>	(ISO Date String) Date first registered in the registry. <b>Please note all registrationDate is stored as UTC time, please make sure you process them accordingly.</b>	"1957-07-14T00:00:00.000Z"	<b>null</b>
<b>content</b>	(string) Formatted HTML that combines all the information we have. You can use them in supported applications for easy rendering	"  <b>Zip Code: </b>60617 <b>Sex: </b>Male <b>Date of birth: </b>1975-05-27 <b>Height: </b>5'10"  <b>Weight: </b> 170 lbs. <b>Race: </b>Black  "	""
<b>offenderUrl</b>	(string) URL to the offender's source State agency	<a href="https://meganslaw.ca.gov/OffenderDisplay.aspx?searchby=offender&amp;ID=186...363&amp;NSOPRFlag=True">https://meganslaw.ca.gov/OffenderDisplay.aspx?searchby=offender&amp;ID=186...363&amp;NSOPRFlag=True</a>	<b>null</b>
<b>offenderImageUrl</b>	(string) URL of the offender's profile image	<a href="https://meganslaw.ca.gov/NSOPWPI.ashx?f=186...363&amp;NSOPRFlag=True">https://meganslaw.ca.gov/NSOPWPI.ashx?f=186...363&amp;NSOPRFlag=True</a>	<b>null</b>
<b>lat</b>	(number) Latitude of the offender's registered residential address	<b>41.85321135</b>	<b>null</b>
<b>lng</b>	(number) Longitude of	<b>-87.72353654</b>	<b>null</b>

	the offender's registered residential address		
<b>updatedAt</b>	(ISO Date String) When Offenders.io last updated this record.	"2023-08-19T02:30:47.579Z"	<b>null</b>
<b>isAbsconder*</b>	(boolean) Whether the offender is a known absconder	true: Yes, false: No, <b>null: No data/can't confirm</b>	<b>null</b>
<b>jurisdiction*</b>	(string) Jurisdiction code of where the offender record is registered to	"WV"	<b>null</b>

*\*Experimental fields: not guaranteed to be always available, client fallback logic is strongly recommended.*

## Default Result Limits

To ensure our API endpoint can provide blazing-fast responses, the following limitations are applied by default.

### GIS Search (query with ?radius={}&lat={}&lng={})

For GIS search, the radius param is optional, when not supplied, the radius will default to 1 mi, and the max for radius is 5 mi for performance considerations.

### Regular Search

Normal search results are limited to 50 records by default to ensure the response time. You should consider using additional fields to filter down your results, such as city or zip code. If you have special use cases for which you need a higher number of records, please let us know.

## Error Handling

### 400s response example:

```
{
  "code": 401,
  "message": "Missing API key"
}
```

## HTTP 400

Bad Request: any requests that we are unable to handle

## HTTP 401

Unauthorized: usually it is because missing API key or invalid API key in your request

## HTTP 405

Method Not Allowed: the request was sent using a method that we don't support

## 200s response example:

Empty results (no match):

```
{
  "offenders": []
}
```

Found matching results:
